Nationality: UK

## **EDUCATION**

University of Edinburgh

PhD Informatics [iCASE Studentship funded by Costain]

(expected) December 2021

Imperial College London

London, UK August 2016

MSc Computing University of Manchester

Manchester, UK

Edinburgh, UK

MSc Applied Mathematics with Numerical Analysis [dissertation funded by NAG]

August 2015

University of Sheffield

Sheffield, UK

BSc Mathematics

August 2012

## **EXPERIENCE**

## University of Edinburgh

Edinburgh UK

Research Associate

September 2021 — Present

o Collaborating on EU-funded projects such as HARMONY and ORCA Hub.

#### University of Edinburgh

Edinburgh UK

Lab demonstrator

January 2019 — June 2020

- o Provided expertise in a supervisory role, for the course System Design Project (SDP), on human-robot interaction, usability testing, and interfaces.
- Role additionally involved marking assignments, ongoing student and group assessment, and bi-weekly demonstration assessment.

#### The Numerical Algorithms Group (NAG)

Manchester, UK

Numerical software developer intern

June 2014 — October 2014

- o Analyzed and implemented the routine GO2ANF in FORTRAN that computes a correlation matrix, subject to preserving a leading principle submatrix by applying the smallest uniform perturbation of the remainder of the approximate input matrix.
- o Routine included in the Mark 25 NAG Library and NAG Toolbox for MATLAB.
- Acknowledged as a code contributor to the NAG Library.

#### University of Manchester

Manchester, UK

Research intern

May 2014 — October 2014

- o Implemented a method in Python that computes a unit triangular matrix with prescribed singular values.
- o Project in collaboration with Professor Nicholas J. Higham, FRS.

Ryanair

Stansted Airport, UK

Engineer intern

May 2014 — October 2014

• Assisted maintenance checks and repairs on Boeing 737-800 aircraft.

## **SKILLS**

- o Programming: Most fluent in Python, then MATLAB, FORTRAN, and C++. Some experience with Lisp, and Lua.
- o Hardware: Experience using KUKA LWR Arm, Clearpath Husky UGV, and Universal Robot 5 (UR5) Arm.
- o Operating systems: Most experienced using Ubuntu and Mac OS. Some experience using Windows.
- o Libraries, packages, and frameworks: ROS/ROS2, Git, CasADi, SNOPT, IPOPT, LAPACK, Matplotlib, Numpy, Scipy, Pandas, PyBullet, OpenAI Gym, Scikit-learn, NAG Library, V-REP, and OpenCV.
- Writing and editing code: IATEX, Emacs, and Vim. Some experience with Visual Studio Code.
- o Time management: Org-mode (for Emacs).

### **PROJECTS**

- o ROS-PyBullet Interface (currently private, release planned in next several months): full physics simulation of a robot and environment in PyBullet, interfaced with ROS. Can be used alongside real robots where the user need only remap ROS topics.
  - Written in Python within a ROS package.
  - I am the lead developer alongside other core contributors from the SLMC Group, University of Edinburgh.
- EXOTica: an extensible tool-set for inverse kinematics, trajectory optimization, and optimal control with a design advocating modularity, extensibility, and integration with ROS.
  - Written in C++ with bindings for Python.
  - Summary of my contributions: several task maps, modifications/additions/bug-fixes to core functionality, and Python bindings; a facility that allows a user to interactively tune a cost function.

## RESPONSIBILITIES

- o Reviewer: ICRA, CASE.
- o Vice President for SIAM Student Chapter, University of Manchester, Sept 2014 Sept 2015.
- Session chair, SIAM Student Chapter Conference, 2014.
- o Program Representative for MSc Group, University of Manchester, Sept 2014 Sept 2015.
- o School of Mathematics Board Member, University of Manchester, Sept 2014 Sept 2015.
- o Team Captain for University of Sheffield Badminton Club, University of Sheffield, Sept 2010 Sept 2012.

## **ADDITIONAL**

- o Professional qualifications: First aid at work (St. Johns Ambulance, UK), National Pool Lifeguard Qualification (Royal Life Saving Society, UK).
- o Personal interests: Badminton, Guitar.
